Prof. Pallavi Nayak
Assistant Professor

Convenor
Dr. B Swathi
HoD - CSE(DS)

Dr. R J Anandhi
Dean - Academics

Dr. Manjunatha
Principal

Organised by
Department of Computer Science and Engineering (Data Science)

On the 15th of May 2026, a Student Outreach Programme was conducted at Cheshire Homes India by the Department of Computer Science and Engineering (Data Science), New Horizon College of Engineering. The outreach activity was organised for the residents of the old age home with the objective of spreading happiness, compassion, and social connection through meaningful interactions and engaging activities. The programme witnessed active participation from 4th and 6th-semester students, who enthusiastically contributed towards making the event memorable and enjoyable for everyone present.

The outreach programme, guided by the faculty coordinators and student volunteers, created a warm and friendly atmosphere where students spent quality time interacting with the elderly residents. Through heartfelt conversations, fun activities, and group interactions, the students aimed to bring joy and positivity to the residents while understanding the importance of empathy, care, and social responsibility in society today.

During the programme, students organised engaging sessions that included interactive games, storytelling activities, music, and casual conversations, encouraging the residents to participate and share their experiences. The enthusiasm and happiness displayed by the residents highlighted the success of the initiative, as both students and residents bonded through meaningful communication and shared moments of joy.

Furthermore, the event provided students with an opportunity to understand the emotional and social needs of elderly individuals. The residents shared valuable life experiences, inspiring students with their wisdom, resilience, and positivity. The interactions fostered mutual respect and understanding, creating a memorable experience for everyone involved in the outreach activity.

In addition to the engaging sessions, the students also extended their support and assistance to the residents in various activities, demonstrating kindness, patience, and compassion throughout the event. The programme encouraged students to recognise the importance of community service and the role of youth in contributing positively towards society.

The outreach programme also served as a platform to strengthen interpersonal skills, teamwork, and social awareness among students. Through collaborative activities and group interactions, participants developed a deeper appreciation for the value of emotional support, companionship, and human connection. The event created a sense of belonging and togetherness among the residents and students alike.

As the programme came to an end, both the residents and students expressed their gratitude and happiness for the opportunity to interact and spend time together. Many participants reflected on the importance of caring for elderly individuals and acknowledged the emotional impact such initiatives can create in society. The event left the students with valuable lessons on empathy, humanity, and social commitment.

Moreover, the outreach activity inspired students to continue participating in social service initiatives and contribute towards the well-being of society through compassion and community engagement. The programme emphasised the significance of kindness, emotional support, and meaningful human interaction in creating a positive social-environment, the importance of continuous learning and encouraged attendees to pursue their interests in data science through academic studies, research endeavours, and practical applications.

In conclusion, the Student Outreach Programme conducted at Cheshire Homes India, Whitefield, Bengaluru, was a great success. Through engaging activities, meaningful conversations, and compassionate interactions, the students were able to bring smiles and happiness to the residents while gaining valuable life lessons and social awareness. The event concluded on a positive note, leaving behind cherished memories and strengthening the spirit of empathy, care, and community service among all participants.
